SUMMARY: I have completed two fellowships in adult joint reconstruction (hip and knee joint replacement) and am recently board certified. My previous professional opportunities have allowed exceptional experience in this subspecialty. Since completion of post-graduate training, I have performed over 200 total hip and knee joint arthroplasties (including over 20 revision cases). I am also experienced with general orthopedics including operative and non-operative treatment of extremity fractures (over 90 operative fracture cases recently).
